CALL FOR PAPERS

SECTION ON

INNOVATIVE HIGH-TECH PRODUCTS AND SERVICES (MIPRO-INOVA)

MIPRO-INOVA continues providing an excellent stage for innovative high-tech projects, products and services, to present their achievements to selected MIPRO audience and use the unique networking opportunity.

The MIPRO-INOVA section is organized with the aim of opening new space for the presentation of as many participants as possible and presentation of as many innovations as possible. The purpose of this approach is to promote and initiate commercialization of high-tech projects, linking the innovators to the markets, potential partners and end-users. Through the MIPRO-INOVA section we wish to offer our guests, representatives of international and regional technological companies, government institutions and agencies in charge of encouraging the high-tech sector and users of high-tech solutions from the region, a better insight into what our numerous producers, service companies, start-up companies and individuals are offering. One of the most important criteria in the choice of participants will be the assessment of the export potential of the innovation.

The presentation should be in PowerPoint.

Time-frame of the presentation: 10 minutes for the presentation of the product or service + 5 minutes for discussion.

Official languages are English and Croatian.

SUMMARY OF THE APPLICATION:

All companies and individuals who wish to present their innovation on the MIPRO-INOVA section must fill out the application form on www.mipro.hr and summarize the essential features of their innovation.

- What is the potential market for the innovation and technology?
- Does the innovation and technology have export potential?
- Which problem does the innovation and technology solve?
- Brief description of the innovation and technology

Please forward to your colleagues
