

### Translation from Croatian to other languages (participant)

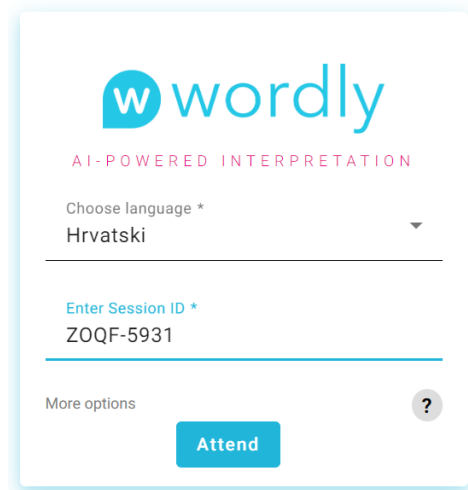

1. Open the following link: <https://attend.wordly.ai/join/ZOQF-5931> or in the case of Zoom on computers, in the upper left corner it will say Live on Wordly. Clicking on this option will open a menu that will say View Stream on Wordly.

2. Clicking on this option will open the same link listed above. It is also possible to use the second option (Copy Streaming Link) to copy the link and manually paste it into the Internet browser. In case the mentioned menu does not exist, it is necessary to click on Wordly in the upper left corner and after that a menu will appear in which it is necessary to click on the word (link) Wordly. After this, the same link mentioned above will open.

3. A Wordly window will open in which the participant can select the desired translation language and click on the Attend button.

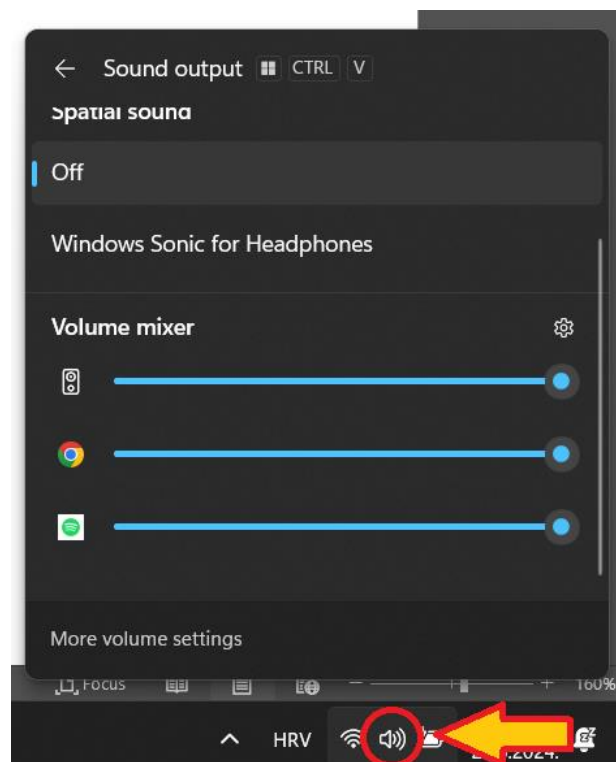

4. A Wordly window will open in which you can change the desired transport language.

- Initially, the translation is printed in text form, and if the participant also wants an audio translation, then he should click on the speaker icon located before the translation language menu.

- It is necessary to reduce the Wordly window in the Internet browser in order to see Zoom.
- In case the Zoom sound is too loud compared to the translation, it is necessary to open the mixer and adjust the volume of Zoom and the Internet browser.

- Alternatively, the participant can completely mute Zoom by clicking the arrow located on the first button at the bottom of Zoom (the microphone icon) and clicking the Leave Computer Audio option. After muting the sound in Zoom, the participant can always return to the audio channel by clicking the first button at the bottom of Zoom labeled Join Audio.
